Ferenc 2008

1 Treatments

Studied treatment  routine T-stenting with sirolimus-eluting stents in both branches

Control treatment  provisional T-stenting with SES placement in the main branch followed by kissing-balloon angioplasty and provisional SES placement in the side branch only for inadequate results

Concomittant treatments  -

Age (y)  67
male (%)  78.7

2 Patients

Patients  patients with a coronary bifurcation lesion

Inclusion criteria  -

Exclusion criteria  -

diabetes  22.3%
hypertension  91.1
previous MI (%)  19.8%
prior PCI (%)  48
prior CABG (%)  3.5
LVEF (%)  60

3 Methods

Blinding  open

Design  Parallel groups

Centers  -

Geographical area  -

Sizes  101/101
