

Clinical trials of Footpump (adjunctive therapy)

TrialResults-center www.trialresultscenter.org

1 thrombosis prevention

Trial	Treatments	Patients	Trials design and methods
Footpump (adjunctive therapy) vs UFH then aspirin			
Stannard (vs UFH+asp) , 1996 n=25/25 follow-up:	intermittent pulsatile pneumatic-pump compression of the plantar venous plexus versus UFH followed by aspirin	patients undergoing elective total hip replacement arthroplasty	Parallel groups open

More details and results :

- mechanical devices for thromboprophylaxis for thrombosis prevention in all type of patients at <http://www.trialresultscenter.org/go-Q402>
