

Clinical trials of error

TrialResults-center www.trialresultscenter.org

1 acute myocardial infarction

Trial	Treatments	Patients	Trials design and methods
error vs control			
Dekleva , 2004 n=NA	-	-	
error vs error			
Zharov , 1991 n=63/52 follow-up:	-	-	Parallel groups
RECOVER 2 , 2009 <i>ongoing</i> [NCT00972270] n=NA follow-up:	-	-	
COMPARE AMI <i>ongoing</i> n=NA	-	-	
SWISS-AMI <i>ongoing</i> n=NA	-	-	

More details and results :

- nitrates for acute myocardial infarction in all type of patients at <http://www.trialresultscenter.org/go-Q144>
- cell-based therapies for acute myocardial infarction in PCI at <http://www.trialresultscenter.org/go-Q313>
- percutaneous left ventricular assist devices for acute myocardial infarction in cardiogenic shock at <http://www.trialresultscenter.org/go-Q352>
- oxygen therapy for acute myocardial infarction in all type of patients at <http://www.trialresultscenter.org/go-Q429>

2 cardiovascular prevention

Trial	Treatments	Patients	Trials design and methods
error vs placebo			
PHASE ongoing n=NA	-	-	

More details and results :

- hormonal replacement therapy for cardiovascular prevention in all type of patients at <http://www.trialresultscenter.org/go-Q452>

References

PHASE, :

ongoing trial

3 acute coronary syndrome

Trial	Treatments	Patients	Trials design and methods
error vs control			
Dekleva , 2004 n=NA	-	-	

More details and results :

- oxygen therapy for acute coronary syndrome in all type of patients at <http://www.trialresultscenter.org/go-Q428>

4 DVT prophylaxis

Trial	Treatments	Patients	Trials design and methods
error vs placebo			
Denver-I n=14/14	SP versus placebo	High risk medical patients	

continued...

Trial	Treatments	Patients	Trials design and methods
Denver-II , 1980 n=19/19 follow-up: 18 months	dipyridamole 100 mg a day and aspirin 1200 mg a day versus placebo	patients with recurring venous thromboembolism	Parallel groups double-blind
Toulouse-II <i>unpublished</i> n=40/40 follow-up:	A990+Dip versus placebo	patients with stroke	Parallel groups double-blind
Den Ottolander , 1982 n=14/14 follow-up:	A1500+RA233 versus placebo	patients with decompensated heart disease	
GRAND , 1987 <i>unpublished</i> n=63/64 follow-up:	GR32191B versus placebo	High risk medical patients	
Jones , 1987 <i>unpublished</i> n=60/60 follow-up:	Dazoxidben versus placebo	High risk medical patients	

More details and results :

- antithrombotics for DVT prophylaxis in medical patients at <http://www.trialresultscenter.org/go-Q87>
- antiplatelets drug for DVT prophylaxis in medical patients at <http://www.trialresultscenter.org/go-Q463>

5 diabetes type 2

Trial	Treatments	Patients	Trials design and methods
error vs placebo			
Pan , 2003 n=261 follow-up: 16 weeks	acarbose 50 mg three times daily versus placebo	patients with impaired glucose tolerance (American Diabetes Association 1997 criteria)	Parallel groups double blind China
STOP-NIDDM (Chiasson) , 2002 n=714/715 follow-up: 3.3 years	acarbose 100mg three times daily versus placebo	patients with impaired glucose tolerance (WHO 1985 criteria)	Parallel groups double blind Canada, Germany, Austria, Nordic countries, Spain, Israel
error vs placebo (add on to met)			
Halimi , 2000 n=74/78 follow-up: 26 weeks	acarbose titrated up to 100 mg three times daily versus placebo	patients with Type 2 diabetes and inadequately controlled with metformin monotherapy	Parallel groups double-blind
Rosenstock , 1998 n=74/74 follow-up: 24 weeks	acarbose forced titration from 25-50 mg t.i.d. and a titration of 50-100 mg tid that was based on glucose control versus placebo	patients with type 2 diabetes inadequately controlled with diet and metformin (2,000 or 2,500 mg/day in divided doses	Parallel groups double-blind

More details and results :

- prevention for diabetes type 2 in all type of patients at <http://www.trialresultscenter.org/go-Q341>
- alpha-glucosidase inhibitors for diabetes type 2 in all type of patients at <http://www.trialresultscenter.org/go-Q379>
- prevention for diabetes type 2 in people with impaired glucose tolerance at <http://www.trialresultscenter.org/go-Q416>

7 thoracic aortic aneurysm

Trial	Treatments	Patients	Trials design and methods
error vs error			
INSTEAD , 2009 [NCT00525356] n=72/68 follow-up: 2 y	thoracic endovascular repair (TEVAR) with a stent graft plus optimal medical therapy versus optimum medical management	patients with stable uncomplicated type-B aortic dissection (dissection of the descending aorta)	Parallel groups open

More details and results :

- endovascular treatment for thoracic aortic aneurysm in all type of patients at <http://www.trialresultscenter.org/go-Q367>
