

# Clinical trials of extended prophylaxis

TrialResults-center [www.trialresultscenter.org](http://www.trialresultscenter.org)

## 1 thrombosis prevention

Trial	Treatments	Patients	Trials design and methods
<b>extended prophylaxis vs standard prophylaxis</b>			
<b>PENTHIFRAPLUS (Eriksson) , 2003</b> n=656 follow-up: 19-23 days	25-31 days of fondaparinux 2.5-mg once-daily versus 6-8 days of fondaparinux 2.5-mg once-daily	patients undergoing hip fracture surgery	Parallel groups double blind
<b>Lausen , 1998</b> n=58/60 follow-up: 28 days	Tinzaparin 3500 UI/qd sc for 28 days started in preop versus Tinzaparin 3500 UI/qd + GES for 1 week started in preop	>18 years, open major abdominal surgery and non cardiac thoracic surgery of >1hour duration.	Parallel groups Open, blinded evaluation
<b>ENOXACAN II (Bergqvist) , 2002</b> n=253/248 follow-up: 3 months	Enoxaparin 40 mg UI/qd sc for 25-31 days started in preop versus Enoxaparin 40 mg IU/qd sc for 6 to 10 days (GES optional) started in preop	>40 years, open major abdominal oncologic elective surgery of >45 minutes duration (includes gynecological surgery)	Parallel groups double blind
<b>FAME (Rasmussen) , 2006</b> n=205/222 follow-up: 3 months	Dalteparin 5000 UI/qd SC for 28 days started in preop versus Dalteparin 5000 UI/qd SC for 7 days + GES started in preop	>18 years, major abdominal surgery of >1 hour duration	Parallel groups Open, blinded evaluation

More details and results :

- antithrombotics for thrombosis prevention in orthopedic surgery at <http://www.trialresultscenter.org/go-Q37>
- antithrombotics for thrombosis prevention in hip Fracture at <http://www.trialresultscenter.org/go-Q40>
- antithrombotics for thrombosis prevention in abdominal surgery at <http://www.trialresultscenter.org/go-Q96>
- pentasaccharide for thrombosis prevention in orthopedic surgery at <http://www.trialresultscenter.org/go-Q188>
- pentasaccharide for thrombosis prevention in all type of patients at <http://www.trialresultscenter.org/go-Q396>
