

Clinical trials of fosinopril

TrialResults-center www.trialresultscenter.org

1 acute myocardial infarction

Trial	Treatments	Patients	Trials design and methods
fosinopril vs placebo			
FAMIS , 1998 n=142/143 follow-up: 2 years	fosinopril versus placebo	patients with anterior acute myocardial infarction within 9 hours of onset	Parallel groups double blind Italy

More details and results :

- angiotensin-Converting Enzyme Inhibitors for acute myocardial infarction in systematic early treatment (with or without sign of HF) at <http://www.trialresultscenter.org/go-Q145>
- angiotensin-Converting Enzyme Inhibitors for acute myocardial infarction in patients with or without HF at <http://www.trialresultscenter.org/go-Q146>

FAMIS Working Party. Am Heart J 1998;136:213-25 [[9704681](#)]

2 hypertension

Trial	Treatments	Patients	Trials design and methods
fosinopril vs placebo			
Zannad et al , 2006 n=196/201 follow-up: 24 months	Fosinopril 20 mg/day versus matched placebo	chronic hemodialysis patients.	double blind

More details and results :

3 heart failure

Trial	Treatments	Patients	Trials design and methods
fosinopril vs placebo			
Brown , 1995 n=116/125 follow-up: 24 weeks	fosinopril 10 or 20 mg/day versus placebo	patients with chronic congestive heart failure (NYHA II-III) not taking digitalis	double blind
FEST (Erhardt) , 1996 n=155/153 follow-up: 12 weeks	fosinopril 40 mg once daily titrated versus placebo	patients with mild to moderately severe heart failure (NYHA II-III)	double blind

More details and results :

4 diabetic kidney disease

Trial	Treatments	Patients	Trials design and methods
fosinopril vs control			
Fogari , 2002 n=104/103 follow-up: NA	amlodipine plus fosinopril (5/10 to 15/30 mg/day versus amlodipine (5 to 15 mg/day)	hypertensive patients with type 2 diabetes and microalbuminuria	Parallel groups NA
