

Clinical trials of isosorbide dinitrate

TrialResults-center www.trialresultscenter.org

1 acute myocardial infarction

Trial	Treatments	Patients	Trials design and methods
isosorbide dinitrate vs placebo			
Hildebrandt , 1992 n=50/50 follow-up:	titrated isosorbide dinitrate (ISDN) for 48h versus placebo	patients with strong clinical and electrocardiographic suspicion of myocardial infarction within 8 hours after the onset of symptoms	Parallel groups double blind

More details and results :

- nitrates for acute myocardial infarction in all type of patients at <http://www.trialresultscenter.org/go-Q144>

2 heart failure

Trial	Treatments	Patients	Trials design and methods
isosorbide dinitrate vs placebo			
NICE (Lewis) , 1999 n=NA follow-up: 12 weeks	isosorbide-5-mononitrate 50 mg once daily versus placebo	patients (NYHA Class 2-3) treated for heart failure, all receiving captopril and most also furosemide	
Franciosa , 1978 n=16/16 follow-up:	isosorbide dinitrate versus placebo	-	double blind

More details and results :

- vasodilators therapy for heart failure in all type of patient at <http://www.trialresultscenter.org/go-Q79>
