

Clinical trials of lanoteplase

TrialResults-center www.trialresultscenter.org

1 acute myocardial infarction

Trial	Treatments	Patients	Trials design and methods
lanoteplase vs accelerated t-PA			
InTIME-II , 2000 n=10038/5022 follow-up: 30 days	lanoteplase 120 KU. kg(-1) as a single intravenous bolus versus up to 100 mg accelerated alteplase given over 90 min	patients presenting within 6 h of onset of ST elevation acute myocardial infarction	Parallel groups double blind worldwide

More details and results :

- myocardial revascularization for acute myocardial infarction in all type of patients at <http://www.trialresultscenter.org/go-Q129>
- fibrinolysis for acute myocardial infarction in all type of patients at <http://www.trialresultscenter.org/go-Q260>
