

Clinical trials of lixisenatide

TrialResults-center www.trialresultscenter.org

1 diabetes type 2

Trial	Treatments	Patients	Trials design and methods
lixisenatide vs glargine once daily			
GETGOAL-L <i>unpublished</i> [NCT00715624] n=328/167 follow-up: 24 weeks	AVE0010 (10,15 and 20 g) in association with basal insulin, with or without metformin versus placebo on top basal insulin	Type 2 diabetes mellitus insufficiently controlled with basal insulin with or without metformin	Parallel groups double-blind USA
lixisenatide vs placebo (add on MET)			
Ratner DRI6012 , 2010 [NCT00299871] n=433/109 follow-up: 13 weeks	subcutaneous lixisenatide doses of 5, 10, 20 or 30 microg once daily or twice daily versus placebo	patients with Type 2 diabetes inadequately controlled with metformin (>= 1000 mg/day)	Parallel groups double-blind (nature not volume) multinational
GETGOAL-F1 <i>ongoing</i> [NCT00763451] n=NA follow-up: 24 weeks	AVE0010 in association with metformin versus placebo	Type 2 diabetes mellitus insufficiently controlled with metformin	double-blind USA
GETGOAL-M <i>ongoing</i> [NCT00712673] n=NA follow-up: 24 weeks	-	Type 2 diabetes mellitus insufficiently controlled with metformin	Parallel groups double-blind USA
lixisenatide vs control			
GETGOAL-MONO Japan LTS <i>ongoing</i> [NCT00905255] n=NA follow-up: 24-76 weeks	AVE0010 once daily treatment in monotherapy versus usual care	type 2 diabetes patients	Parallel groups open Japan
lixisenatide vs placebo			
ELIXA [NCT01147250] n=6068 follow-up: 25 months (median)	lixisenatide versus placebo	patients with T2DM and a recent ACS event	double-blind 49 countries

continued...

Trial	Treatments	Patients	Trials design and methods
ELIXA (EFC11319) <i>ongoing</i> [NCT01147250] n=NA follow-up:	Lixisenatide 20 g one daily versus placebo	type 2 diabetic patients who experienced an acute coronary syndrome	double-blind USA
GETGOAL-MONO <i>ongoing</i> [NCT00688701] n=NA follow-up: 12 weeks	AVE0010 in monotherapy versus lixisenatide	Type 2 diabetes mellitus not treated with any antidiabetic agent	Parallel groups double-blind USA
lixisenatide vs placebo (add on basal insulin)			
GETGOAL-L <i>unpublished</i> [NCT00715624] n=328/167 follow-up: 24 weeks	AVE0010 (10,15 and 20 g) in association with basal insulin, with or without metformin versus placebo on top basal insulin	Type 2 diabetes mellitus insufficiently controlled with basal insulin with or without metformin	double-blind USA
GetGoal Duo1 <i>ongoing</i> [NCT00975286] n=NA follow-up: 24 weeks	Lixisenatide as an add-on treatment to insulin glargine and metformin versus placebo	patients with type 2 diabetes insufficiently controlled with insulin glargine and metformin	Parallel groups double-blind USA
GETGOAL-L-ASIA <i>ongoing</i> [NCT00866658] n=NA follow-up: 24 weeks	24 weeks of AVE0010 versus placebo on Top of Basal Insulin +/- Sulfonylurea	Patients With Type 2 Diabetes Insufficiently Controlled With Basal Insulin With or Without Sulfonylurea	double-blind Japan
lixisenatide vs placebo (add on MET+/-SU)			
GetGoal-M-As <i>ongoing</i> [NCT01169779] n=NA follow-up: 24 weeks	Lixisenatide (Titration phase: 10 g maintenance phase: 20 g, add-on treatment to metformin with or without sulfonylurea versus add-on treatment to metformin with or without sulfonylurea	-	double-blind China
lixisenatide vs placebo (add on SU+/-MET)			
GETGOAL-S <i>ongoing</i> [NCT00713830] n=NA follow-up: 24 weeks	AVE0010 in association with sulfonylurea without or with metformin versus placebo	patients with type 2 diabetes not adequately controlled with sulfonylurea	double-blind USA
lixisenatide vs placebo (add on TZD+/-MET)			

continued...

Trial	Treatments	Patients	Trials design and methods
GETGOAL-P <i>ongoing</i> [NCT00763815] n=NA follow-up: 24 weeks	AVE0010 in association with pioglitazone with or without metformin versus placebo	Type 2 diabetes mellitus insufficiently controlled with pioglitazone with or without metformin	Parallel groups double-blind USA
lixisenatide vs exenatide			
GetGoal-X <i>ongoing</i> [NCT00707031] n=NA follow-up: 24 weeks	AVE0010 in association with metformin versus exenatide in association with metformin	type 2 diabetes	parallel groups open USA
lixisenatide vs sitagliptin (add on MET)			
EFC10780 , 2010 <i>ongoing</i> [NCT00976937] n=NA follow-up: 24 weeks	Lixisenatide titrated 15-20 g once daily versus Sitagliptin (add-on to Metformin)	Obese Type 2 Diabetic Patients Younger Than 50	Parallel groups double-blind WW

More details and results :

- insulin secretagogues peptides (incretins) for diabetes type 2 in all type of patients at <http://www.trialresultscenter.org/go-Q381>
- antidiabetic drugs for diabetes type 2 in patients inadequately controlled on metformin at <http://www.trialresultscenter.org/go-Q509>
- antidiabetic drugs for diabetes type 2 in Patients inadequately controlled on MET+SU therapy at <http://www.trialresultscenter.org/go-Q510>
- antidiabetic drugs for diabetes type 2 in patients with insufficient glycaemic control with bitherapy at <http://www.trialresultscenter.org/go-Q511>
- antidiabetic drugs for diabetes type 2 in patients inadequately controlled on monotherapy at <http://www.trialresultscenter.org/go-Q512>
- antidiabetic drugs for diabetes type 2 in patients inadequately controlled with insulin at <http://www.trialresultscenter.org/go-Q513>
- insulin therapy for diabetes type 2 in all type of patients at <http://www.trialresultscenter.org/go-Q548>
- glucose lowering for cardiovascular prevention for diabetes type 2 in all type of patients at <http://www.trialresultscenter.org/go-Q576>
- glucose lowering for cardiovascular prevention for diabetes type 2 in meta-regression at <http://www.trialresultscenter.org/go-Q692>
