

# Clinical trials of nifedipine

TrialResults-center [www.trialresultscenter.org](http://www.trialresultscenter.org)

## 1 hypertension

Trial	Treatments	Patients	Trials design and methods
<b>nifedipine vs trichlormethiazide</b>			
<a href="#">NICS-EH , 1999</a> n=215/214 follow-up: 4.5 years	Nifedipine SR 20mg twice daily versus trichlormethiazide 2mg once daily	>=60 years of age with systolic blood pressure of 160 to 220 mm Hg and diastolic blood pressure <115 mm Hg	Parallel groups Double blind

More details and results :

- anti hypertensive agents for hypertension in elderly (60 years and more) at <http://www.trialresultscenter.org/go-Q9>
- anti hypertensive agents for hypertension in all type of patient at <http://www.trialresultscenter.org/go-Q13>
- anti hypertensive agents for hypertension in uncomplicated hypertension at <http://www.trialresultscenter.org/go-Q685>

Randomized double-blind comparison of a calcium antagonist and a diuretic in elderly hypertensives. National Intervention Cooperative Study in Elderly Hypertensives Study Group. Hypertension 1999 Nov;34:1129-33 [[10567194](#)]

## 2 heart failure

Trial	Treatments	Patients	Trials design and methods
<b>nifedipine vs control</b>			
<a href="#">Gheorghade , 1991</a> <i>unpublished</i> n=NA follow-up: 4 months	-	CHD multiple cause, NYHA class III	Double blind
<a href="#">Abrams , 1993</a> <i>unpublished</i> n=NA follow-up: 4 months	-	CHD multiple cause, NYHA class III-IV	Double blind

More details and results :

- calcium channel blockers for heart failure in all type of patients at <http://www.trialresultscenter.org/go-Q70>
