

Clinical trials of quinapril

TrialResults-center www.trialresultscenter.org

1 patients at high risk for cardiovascular events

Trial	Treatments	Patients	Trials design and methods
quinapril vs placebo			
QUIET , 2001 n=878/872 follow-up: 27 months	Quinapril 20mg one daily versus Placebo	patients with angiographic evidence of coronary artery disease without systolic leftventricular dysfunction	Parallel groups double blind United States, Canada, Europe

More details and results :

- angiotensin-Converting Enzyme Inhibitors for patients at high risk for cardiovascular events in all type of patients at <http://www.trialresultscenter.org/go-Q98>
- inhibition of the renin-angiotensin system (ACEI or ARB) for patients at high risk for cardiovascular events in all type of patients at <http://www.trialresultscenter.org/go-Q157>
