

Clinical trials of valsartan

TrialResults-center www.trialresultscenter.org

1 acute myocardial infarction

Trial	Treatments	Patients	Trials design and methods
Valsartan+ACE inhibitor vs ACE inhibitor only			
VALIANT (valsartan+capropril) , 2003 n=4885/4909 follow-up: Median, 24.7 mo	Valsartan, 40 mg twice daily, plus captopril, 25 mg three times daily versus Captopril, 25 mg 3 times daily	patients within 10 days of a MI complicated by HF	Parallel groups Double blind 24
Valsartan vs Captopril			
VALIANT (valsartan alone) , 2003 n=4909/4909 follow-up: Median, 24.7 mo	Valsartan, 160 mg twice daily versus Captopril, 50 mg 3 times daily	patients within 10 days of a MI complicated by HF	Parallel groups Double blind 24

More details and results :

- angiotensin-receptor blockers for acute myocardial infarction in all type of patients at <http://www.trialresultscenter.org/go-Q253>

VALIANT (valsartan+capropril), 2003:

Pfeffer MA, McMurray JJ, Velazquez EJ, Rouleau JL, Kober L, Maggioni AP, Solomon SD, Swedberg K, Van de Werf F, White H, Leimberger JD, Henis M, Edwards S, Zelenkofske S, Sellers MA, Califf RM Valsartan, captopril, or both in myocardial infarction complicated by heart failure, left ventricular dysfunction, or both. N Engl J Med 2003 Nov 13;349:1893-906 [[14610160](#)]

VALIANT (valsartan alone), 2003:

Pfeffer MA, McMurray JJ, Velazquez EJ, Rouleau JL, Kober L, Maggioni AP, Solomon SD, Swedberg K, Van de Werf F, White H, Leimberger JD, Henis M, Edwards S, Zelenkofske S, Sellers MA, Califf RM Valsartan, captopril, or both in myocardial infarction complicated by heart failure, left ventricular dysfunction, or both. N Engl J Med 2003 Nov 13;349:1893-906 [[14610160](#)]

2 hypertension

Trial	Treatments	Patients	Trials design and methods
valsartan vs amlodipine			
VALUE , 2004 [NCT00129233] n=7649/7596 follow-up: 4.2 y (mean)	valsartan based regimen versus amlodipine based regimen	patients, aged 50 years or older with treated or untreated hypertension and high risk of cardiac events	Parallel groups Double blind 31 countries
NAGOYA HEART , 2011 <i>unpublished</i> [NCT00129233] n=575/575 follow-up: 3.2 y median	blood-pressure-lowering therapy based on valsartan; blood-pressure goal of <130/80 mm Hg versus blood-pressure-lowering therapy based on amlodipine; blood-pressure goal of <130/80 mm Hg	patients with hypertension with type 2 diabetes or impaired glucose tolerance	Parallel groups open Japan
Valsartan vs Captopril			
VALIANT/Val , 2003 n=4909/4909 follow-up: 2.1 y	Valsartan versus Captopril	patients with myocardial infarction complicated by left ventricular systolic dysfunction, heart failure, or both	Parallel groups double-blind
Valsartan + captopril vs Captopril			
VALIANT/Val+Cap , 2003 n=4885/4909 follow-up: 2.1 y	Valsartan + captopril versus Captopril	patients with myocardial infarction complicated by left ventricular systolic dysfunction, heart failure, or both	Parallel groups double-blind

33

3 heart failure

Trial	Treatments	Patients	Trials design and methods
sacubitril/valsartan vs enalapril			
PARADIGM-HF , 2014 [NCT01035255] n=NA follow-up:	-	-	
valsartan vs no valsartan			
VALIDD , 2007 [NCT00170924] n=186/198 follow-up: 38 weeks	valsartan titrated up to 320 mg once daily versus placebo	Patients with hypertension and evidence of diastolic dysfunction	Parallel groups double blind USA, canada
valsartan vs placebo			
Mazayev et al. (vs placebo) , 1998 n=75/26 follow-up: 4 wk	valsartan 40, 80 or 160 mg twice daily versus Placebo	patients with chronic heart failure previously untreated with ACE inhibitors	Parallel groups Double blind Russia
valsartan+ACE inhibitor vs ACE inhibitor only			

continued...

Trial	Treatments	Patients	Trials design and methods
V-HeFT , 1999 n=55/28 follow-up: 4 wk	Valsartan 80 mg and 160mg twice daily (plus ACE inhibitor) versus Placebo (plus usual ACE inhibitor)	Patients with stable symptomatic congestive heart failure (CHF) receiving long-term ACE inhibitor therapy (NYHA functional class II,III, or IV) and PCWP \geq 15 mm Hg	Parallel groups Double blind US
Val-HeFT , 2001 n=2511/2499 follow-up: 23 mo	Valsartan, 160 mg twice daily (plus ACE inhibitor) versus Placebo (plus ACE inhibitor)	patients with heart failure of New York Heart Association (NYHA) class II, III, or IV	Parallel groups Double blind 16 countries
valsartan vs enalapril			
HEAVEN , 2002 n=70/71 follow-up: 12 wk	Valsartan, 160 mg daily versus Enalapril, 10 mg twice daily	Men and women with mild/moderate heart failure stabilised on an angiotensin-converting enzyme inhibitor and left ventricular ejection fraction 0.45 or less	Parallel groups Double blind
valsartan vs Lisinopril			
Mazayev et al. (vs lisinopril) , 1998 n=75/15 follow-up: 4 wk	Valsartan, 40 mg, 80mg, 160mg twice daily versus lisinopril 10mg once daily	patients with chronic heart failure	Parallel groups NA Russia

More details and results :

4 miscellaneous

Trial	Treatments	Patients	Trials design and methods
valsartan vs amlodipine			
VALUE, 2004 [NCT00129233] n=7649/7596 follow-up: 4.2 y (mean)	valsartan based regimen versus amlodipine based regimen	patients, aged 50 years or older with treated or untreated hypertension and high risk of cardiac events	Parallel groups Double blind 31 countries

5 atrial fibrillation

Trial	Treatments	Patients	Trials design and methods
valsartan vs placebo			
Val-HeFT (AF ancillary study) , 2003 n=2506/2494 follow-up: 1.92 y	valsartan versus placebo	Heart failure	
GISSI-AF (Disertori) , 2009 [NCT00376272] n=722/720 follow-up: 1 year	valsartan versus placebo	patients in sinus rhythm but with either two or more documented episodes of atrial fibrillation in the previous 6 months or successful cardioversion for atrial fibrillation in the previous 2 weeks and with underlying cardiovascular disease, diabetes, or left atrial enlargement	Parallel groups double blind

More details and results :

- prevention for atrial fibrillation in patient with history of atrial fibrillation at <http://www.trialresultscenter.org/go-Q328>
- prevention for atrial fibrillation in patients without history of AF (primary prevention) at <http://www.trialresultscenter.org/go-Q331>

6 diabetes type 2

Trial	Treatments	Patients	Trials design and methods
valsartan vs placebo			
NAVIGATOR valsartan , 2010 [NCT00097786] n=4631/4675 follow-up: 5 years	valsartan up to 160 mg daily versus placebo	subjects with impaired glucose tolerance and either CV disease or CV risk factors	Factorial plan double-blind 40 countries
valsartan vs amlodipine			
NAGOYA HEART , 2011 <i>unpublished</i> [NCT00129233] n=575/575 follow-up: 3.2 y median	blood-pressure-lowering therapy based on valsartan; blood-pressure goal of <130/80 mm Hg versus blood-pressure-lowering therapy based on amlodipine; blood-pressure goal of <130/80 mm Hg	patients with hypertension with type 2 diabetes or impaired glucose tolerance	Parallel groups open Japan

More details and results :
