

Clinical trials of resynchronization (CRT) - defibrillators (ICD) for heart failure in survivors of cardiac arrest

TrialResults-center www.trialresultscenter.org

1 Implantable cardioverter defibrillator therapy

Trial	Treatments	Patients	Trials design and methods
ICD vs no ICD			
CASH , 2000 n=99/189 follow-up: 57 months	ICD versus antiarrhythmic agents (amiodarone and metoprolol)	secondary prevention: survivors of cardiac arrest secondary to documented ventricular arrhythmias	Parallel groups open
AVID , 1997 [NCT00000531] n=507/509 follow-up: 18.2 months	ICD versus class III antiarrhythmic drugs, primarily amiodarone	secondary prevention: patients who had been resuscitated from near-fatal ventricular fibrillation or who had undergone cardioversion from sustained ventricular tachycardia	Parallel groups open
CIDS , 2000 n=328/331 follow-up: 36 months	ICD versus amiodarone	secondary prevention: patients with resuscitated VF or VT or with unmonitored syncope	Parallel groups

Entry terms: catheter ablation

2 About TrialResults-center.org

TrialResults-center is an innovative knowledge database that collects the results of RCTs and provides dynamic interactive systematic reviews and meta-analysis in the field of all major heart and vessels diseases.

The TrialResults-center database provides a unique view of the treatment efficacy based on all data provided directly from clinical trial results, offering a valuable alternative to personal bibliographic search, published meta-analysis, etc. Furthermore, it would allow comparing easily the various concurrent therapeutic for the same clinical condition.

Rigorous meta-analysis method is used to populate TrialResults-center: widespread search of published and non published trials, study selection using pre-specified criteria, data extraction using standard form.

TrialResults-center is continually updated on a weekly basis. We continually search all new results (whatever their publication channel) and these news results are immediately added to the database with a maximum of 1 week.

TrialResults-center is non-profit and self-funded.
