

Clinical trials of antiplatelets drug for acute coronary syndrome in patients with scheduled percutaneous coronary intervention

TrialResults-center www.trialresultscenter.org

1 platelet aggregation inhibitors

Trial	Treatments	Patients	Trials design and methods
ASA high dose vs ASA low dose			
CURRENT - OASIS 7 (ASA) , 2010 [NCT00335452] n=12507/12579 follow-up: 30 days	High-dose aspirin versus Low-dose aspirin	ACS patients referred for an invasive strategy (scheduled for percutaneous coronary intervention no more than 72 hours after randomization)	Factorial plan open

2 thienopyridine

Trial	Treatments	Patients	Trials design and methods
prasugrel vs clopidogrel			
TRITON-TIMI 38 , 2007 [NCT00097591] n=6813/6795 follow-up:	prasugrel 60-mg loading dose and 10-mg daily maintenance dose, for 6 to 15 months versus clopidogrel (a 300-mg loading dose and a 75-mg daily maintenance dose) for 6 to 15 months	patients with moderate-to-high-risk acute coronary syndromes (UA, NSTEMI,STEMI) with scheduled percutaneous coronary intervention	Parallel groups double blind 30 countries
clopidogrel high-dose regimen vs clopidogrel standard-dose			
CURRENT OASIS 7 (clopidogrel) , 2010 [NCT00335452] n=12520/12566 follow-up: 30 days	Double-dose clopidogrel versus Standard-dose clopidogrel	ACS patients referred for an invasive strategy (scheduled for percutaneous coronary intervention no more than 72 hours after randomization)	Factorial plan open

3 About TrialResults-center.org

↳ TrialResults-center is an innovative knowledge database that collects the results of RCTs and provides dynamic interactive systematic reviews and meta-analysis in the field of all major heart and vessels diseases.

The TrialResults-center database provides a unique view of the treatment efficacy based on all data provided directly from clinical trial results, offering a valuable alternative to personal bibliographic search, published meta-analysis, etc. Furthermore, it would allow comparing easily the various concurrent therapeutic for the same clinical condition.

Rigorous meta-analysis method is used to populate TrialResults-center: widespread search of published and non published trials, study selection using pre-specified criteria, data extraction using standard form.

TrialResults-center is continually updated on a weekly basis. We continually search all new results (whatever their publication channel) and these news results are immediately added to the database with a maximum of 1 week.

TrialResults-center is non-profit and self-funded.
