

# Clinical trials of calcium channel blockers for acute coronary syndrome in all type of patients

TrialResults-center [www.trialresultscenter.org](http://www.trialresultscenter.org)

## 1 calcium-channel blockers

Trial	Treatments	Patients	Trials design and methods
<b>nifedipine vs metoprolol</b>			
<b>HINT (nifedipine vs metoprolol) , 1988</b> n=NA follow-up: ND	nifedipine versus metoprolol	patients with unstable angina not pretreated with a beta-blocker and of nifedipine	Parallel groups ND
<b>diltiazem vs placebo</b>			
<b>Gbel (Dutch study) , 1995</b> n=129 follow-up: ND	diltiazem intravenously versus glyceryl trinitrate intravenously	patients with unstable angina	Parallel groups double blind
<b>DRS , 1986</b> n=287/289 follow-up: ND	diltiazem 90 mg every six hours up to 14 days versus placebo	patients with non-Q-wave myocardial infarct, 24 to 72 hours after the onset of infarction	double blind

## 2 About TrialResults-center.org

TrialResults-center is an innovative knowledge database that collects the results of RCTs and provides dynamic interactive systematic reviews and meta-analysis in the field of all major heart and vessels diseases.

The TrialResults-center database provides a unique view of the treatment efficacy based on all data provided directly from clinical trial results, offering a valuable alternative to personal bibliographic search, published meta-analysis, etc. Furthermore, it would allow comparing easily the various concurrent therapeutic for the same clinical condition.

Rigorous meta-analysis method is used to populate TrialResults-center: widespread search of published and non published trials, study selection using pre-specified criteria, data extraction using standard form.

TrialResults-center is continually updated on a weekly basis. We continually search all new results (whatever their publication channel) and these news results are immediately added to the database with a maximum of 1 week.

TrialResults-center is non-profit and self-funded.
