

Clinical trials of anti-anginal drugs for stable angina in all type of patients

TrialResults-center www.trialresultscenter.org

1 ranolazine

| Trial | Treatments | Patients | Trials design and methods |
|---|--|---|--|
| ranolazine 1000mg vs placebo | | | |
| MARIZA , 2004 n=191/191 follow-up: 1 week | ranolazine 500 mg twice daily (sustained-release ranolazine 500, 1,000, or 1,500 mg) versus placebo | Patients with angina-limited exercise | Cross over double blind US, Czech Republic, Poland, Canada |
| RAN080 , 2005 n=158/158 follow-up: 1 week | ranolazine IR 400mg TID versus placebo | patients who had symptom-limited exercise | Cross over double blind Europe, canada |
| ranolazine 1000mg vs placebo (on top standard treatment) | | | |
| CARISA 1000mg , 2004 n=261/258 follow-up: 12 weeks | ranolazine 1000mg (in combination with beta-blockers or calcium antagonists) versus placebo | patients with severe chronic angina who have symptoms of chronic angina and who experience angina and ischemia at low workloads despite taking standard doses of atenolol, amlodipine, or diltiazem | Parallel groups double blind |
| ranolazine 1000mg + amlodipine vs placebo + amlodipine | | | |
| ERICA , 2006 [NCT00091429] n=281/284 follow-up: 6 weeks | ranolazine 1000 mg twice a day for 6 weeks + amlodipine (10 mg/d) versus placebo + amlodipine (10 mg/d) | patients with stable chronic angina already treated with the maximal dose of amlodipine (10mg/d) | Parallel groups double blind Europe, USA, Canada |

2 About TrialResults-center.org

TrialResults-center is an innovative knowledge database that collects the results of RCTs and provides dynamic interactive systematic reviews and meta-analysis in the field of all major heart and vessels diseases.

The TrialResults-center database provides a unique view of the treatment efficacy based on all data provided directly from clinical trial results, offering a valuable alternative to personal bibliographic search, published meta-analysis, etc. Furthermore, it would allow comparing easily the various concurrent therapeutic for the same clinical condition.

Rigorous meta-analysis method is used to populate TrialResults-center: widespread search of published and non published trials, study selection using pre-specified criteria, data extraction using standard form.

TrialResults-center is continually updated on a weekly basis. We continually search all new results (whatever their publication channel) and these news results are immediately added to the database with a maximum of 1 week.

TrialResults-center is non-profit and self-funded.
