

# Clinical trials of screening for CAD for diabetes type 2 in all type of patients

TrialResults-center [www.trialresultscenter.org](http://www.trialresultscenter.org)

## 1 screening for CAD

Trial	Treatments	Patients	Trials design and methods
<b>screening for CAD vs no screening</b>			
<b>DIAD , 2009</b> [NCT00769275] n=561/562 follow-up: 4.8 years	screening with adenosine-stress radionuclide myocardial perfusion imaging (MPI) versus no screening	participants with type 2 diabetes and no symptoms of CAD	Parallel groups open USA, Canada
<b>DYNAMIT , 2010</b> [NCT00627783] n=316/315 follow-up:	screening for silent ischemia using a bicycle exercise test or Dipyridamole Single Photon Emission Computed Tomography versus no screening	diabetic patients with no evidence of coronary artery disease and at least 2 additional cardiovascular risk factors	Parallel groups open France

## 2 About TrialResults-center.org

TrialResults-center is an innovative knowledge database that collects the results of RCTs and provides dynamic interactive systematic reviews and meta-analysis in the field of all major heart and vessels diseases.

The TrialResults-center database provides a unique view of the treatment efficacy based on all data provided directly from clinical trial results, offering a valuable alternative to personal bibliographic search, published meta-analysis, etc. Furthermore, it would allow comparing easily the various concurrent therapeutic for the same clinical condition.

Rigorous meta-analysis method is used to populate TrialResults-center: widespread search of published and non published trials, study selection using pre-specified criteria, data extraction using standard form.

TrialResults-center is continually updated on a weekly basis. We continually search all new results (whatever their publication channel) and these news results are immediately added to the database with a maximum of 1 week.

TrialResults-center is non-profit and self-funded.
