

Clinical trials of vasopressin antagonist for heart failure in all type of patients

TrialResults-center www.trialresultscenter.org

1 oral vasopressin antagonist

Trial	Treatments	Patients	Trials design and methods
tolvaptan vs placebo			
EVEREST Clinical Status , 2007 [NCT00071331] n=NA follow-up:	-	patients hospitalized with heart failure	
EVEREST Outcome , 2007 n=NA	-	patients hospitalized with heart failure	
tovalpan vs placebo			
Udelson , 2007 [NCT00043758] n=120/120 follow-up: 1 year	tolvaptan 30 mg/day versus placebo	patients with HF and reduced systolic function	Parallel groups double blind

2 About TrialResults-center.org

TrialResults-center is an innovative knowledge database that collects the results of RCTs and provides dynamic interactive systematic reviews and meta-analysis in the field of all major heart and vessels diseases.

The TrialResults-center database provides a unique view of the treatment efficacy based on all data provided directly from clinical trial results, offering a valuable alternative to personal bibliographic search, published meta-analysis, etc. Furthermore, it would allow comparing easily the various concurrent therapeutic for the same clinical condition.

Rigorous meta-analysis method is used to populate TrialResults-center: widespread search of published and non published trials, study selection using pre-specified criteria, data extraction using standard form.

TrialResults-center is continually updated on a weekly basis. We continually search all new results (whatever their publication channel) and these news results are immediately added to the database with a maximum of 1 week.

TrialResults-center is non-profit and self-funded.
