

Clinical trials of cell-based therapies for coronary artery disease in untractable angina

TrialResults-center www.trialresultscenter.org

1 stem cells

Trial	Treatments	Patients	Trials design and methods
autologous bone marrow-derived mononuclear cells vs placebo			
Ramshorst , 2009 [ISRCTN58194927] n=25/25 follow-up: 6 months	intramyocardial injection of 100 x 10(6) autologous bone marrow-derived mononuclear cells versus placebo	patients with chronic myocardial ischemia	Parallel groups double blind Netherlands
CD34+ cells vs placebo			
Losordo , 2011 [NCT00300053] n=167 follow-up: 6 months	intramyocardial injection of autologous CD34+ cells versus placebo	patients with refractory angina who have exhausted all other treatment options	Parallel groups double-blind
stem cells CD34+ vs placebo			
Losordo , 2007 [NCT00081913] n=NA follow-up:	Injection of Autologous CD34-Positive Cells versus placebo	Patientswith Canadian Cardiovascular Society class 3 or 4 angina who were undergoing optimal medical treatment and who were not candidates for mechanical revascularization	Parallel groups double blind

2 About TrialResults-center.org

TrialResults-center is an innovative knowledge database that collects the results of RCTs and provides dynamic interactive systematic reviews and meta-analysis in the field of all major heart and vessels diseases.

The TrialResults-center database provides a unique view of the treatment efficacy based on all data provided directly from clinical trial results, offering a valuable alternative to personal bibliographic search, published meta-analysis, etc. Furthermore, it would allow comparing easily the various concurrent therapeutic for the same clinical condition.

Rigorous meta-analysis method is used to populate TrialResults-center: widespread search of published and non published trials, study selection using pre-specified criteria, data extraction using standard form.

TrialResults-center is continually updated on a weekly basis. We continually search all new results (whatever their publication channel) and these news results are immediately added to the database with a maximum of 1 week.

TrialResults-center is non-profit and self-funded.
