

# Clinical trials of off-pump CABG for CABG surgery in all type of patients

TrialResults-center [www.trialresultscenter.org](http://www.trialresultscenter.org)

## 1 CABG

Trial	Treatments	Patients	Trials design and methods
<b>off-pump vs on-pump</b>			
<b>Al-Ruzzeh b , 2006</b> n=84/84 follow-up: 6 months	off-pump versus coronary artery bypass grafting surgery using cardiopulmonary bypass	patients requiring primary isolated coronary artery bypass grafting surgery	Parallel groups open with blinded assessment UK
<b>Alwan , 2004</b> n=35/35 follow-up: In-hospital/30-day mortality	beating heart revascularization versus arrested heart revascularization	patients undergoing CABG	Parallel groups open
<b>Ascione , 2006</b> n=20/20 follow-up: In-hospital	off-pump coronary artery bypass grafting versus artery bypass grafting with cardiopulmonary bypass	patient undergoing CABG	Parallel groups open
<b>Ascionee , 2005</b> n=10/10 follow-up: In-hospital	off-pump CABG versus on-pump CABG	patient undergoing CABG	Parallel groups open
<b>Baker , 2001</b> n=12/14 follow-up:	off pump surgery using the Octopus II stabilizing system versus conventional CABG cardiopulmonary bypass	elective patients requiring surgery for double or triple vessel disease	open
<b>BBS (Moller) , 2010</b> [NCT00120991] n=177/164 follow-up: 30 days	off-pump CABG versus on-pump CABG	patients >54 years of age with three-vessel coronary artery disease with EuroSCORE of 5-16 undergoing elective or sub-acute coronary artery bypass grafting	Parallel groups open blind assessor
<b>BHACAS I (Ascione) , 1999</b> n=100/100 follow-up: 65279;25 months	off-pump versus on-pump	cardiac surgery candidates	Parallel groups open with blinded assessment
<b>BHACAS II (Angelini) , 2002</b> n=100/101 follow-up: 13.7 months	off-pump versus on-pump	patients with myocardial infarction in the past month or who required grafting of the circumflex artery distal to the first obtuse marginal branch	Parallel groups open with blinded assessment
<b>Caputo , 2002</b> n=20/20 follow-up: In-hospital	beating heart surgery (off-pump) versus conventional CABG with cardiopulmonary bypass	patients undergoing coronary artery bypass grafting	Parallel groups open

continued...

<b>Trial</b>	<b>Treatments</b>	<b>Patients</b>	<b>Trials design and methods</b>
<b>Carrier , 2003</b> n=32/33 follow-up: In-hospital/30-day mortality	off-pump CABG versus on-pump CABG	high-risk patients	Parallel groups open
<b>Covino , 2001</b> n=21/16 follow-up: In-hospital	-	-	open
<b>Czerny , 2000</b> n=NA	-	-	open
<b>Czerny b , 2001</b> n=NA	-	-	open
<b>Diegeler , 2000</b> n=20/20 follow-up: In-hospital	coronary artery bypass operation without cardiopulmonary bypass (off-pump CABG) versus conventional coronary artery bypass operation using cardiopulmonary bypass	cardiac surgery candidates	Parallel groups open
<b>DOORS , 2009</b> [NCT00123981] n=NA follow-up: 30 days	Off-Pump Coronary Artery Bypass Grafting versus on-pump CABG	elderly patients	Parallel groups open
<b>Dorman , 2004</b> n=NA	-	-	open
<b>Gasz , 2004</b> n=NA	-	-	open
<b>Gerola , 2001</b> n=80/80 follow-up: In-hospital/30-day mortality	off-pump coronary artery bypass versus on-pump CABG	low-risk patients undergoing CABG	Parallel groups open
<b>Gu , 1998</b> n=31/31 follow-up: 65279;In-hospital	minimally invasive coronary artery bypass grafting versus conventional coronary artery bypass grafting with cardiopulmonary bypass	patients with isolated stenosis of the left anterior descending coronary artery	Parallel groups open
<b>Guler , 2001</b> n=NA	-	-	open
<b>Gulielmos , 1999</b> n=20/20 follow-up: 3 months	off-pump coronary artery bypass with median sternotomy or off-pump procedure and lateral minithoracotomy versus conventional technique or lateral minithoracotomy and cardiopulmonary bypass	patients with coronary artery single-vessel disease	Parallel groups open
<b>Jares , 2006</b> n=10/10 follow-up: 24 h	off-pump CABG versus on-pump CABG	patients scheduled for coronary bypass grafting	Parallel groups open

continued...

<b>Trial</b>	<b>Treatments</b>	<b>Patients</b>	<b>Trials design and methods</b>
<b>Khan , 2004</b> n=54/49 follow-up: 3 months	off-pump CABG versus conventional "on-pump" surgery	patient undergoing CABG	Parallel groups open
<b>Kobayashi , 2005</b> n=81/86 follow-up: 30 days	off-pump CABG versus on-pump CABG	patients referred for elective primary CABG	Parallel groups open
<b>Kunes , 2007</b> n=17/17 follow-up: 7 days	off-pump CABG versus on-pump CABG	patient undergoing CABG	Parallel groups open
<b>Lee , 2003</b> n=30/30 follow-up:	off-pump CABG versus conventional on-pump CABG	patients undergoing CABG	open
<b>Legare , 2004</b> [NCT00216957] n=150/150 follow-up: 3.8 years	off-pump CABG versus on-pump CABG	patients undergoing CABG	Parallel groups open
<b>Lingaas , 2003</b> n=60/60 follow-up: 12 months	off-pump CABG versus on-pump CABG	patient undergoing CABG	Parallel groups open
<b>Matata , 2000</b> n=10/10 follow-up: In-hospital	off-pump versus on-pump	cardiac surgery candidates	Parallel groups open
<b>Michaux , 2006</b> n=25/25 follow-up: 30 days	off-pump CABG versus on-pump CABG	patients scheduled for elective coronary artery bypass surgery	Parallel groups open
<b>Motallebzadeh , 2004</b> n=15/20 follow-up: In-hospital	off-pump CABG versus on-pump CABG	patients admitted for CABG	Parallel groups open
<b>Motallebzadeh b , 2006</b> n=108/104 follow-up: 6 months	off-pump CABG versus on-pump CABG	patients admitted for elective coronary artery bypass graft surgery	Parallel groups open
<b>Muneretto , 2003</b> n=NA	-	-	open
<b>Niranjan , 2006</b> n=40/40 follow-up: In-hospital	off-pump CABG with or without cell saver blood transfusion versus on-pump CABG with or without cell saver blood transfusion	patient undergoing CABG	open
<b>OCTOPUS (van Dijk) , 2002</b> n=142/139 follow-up: 5 years	off-pump surgery versus on-pump surgery	patients with predominantly single- or double-vessel coronary disease	Parallel groups open with blinded assessment the Netherlands
<b>Ozkara , 2007</b> n=22/22 follow-up: In-hospital	off-pump CABG versus on-pump CABG	patients admitted for elective CABG	Parallel groups open

continued...

<b>Trial</b>	<b>Treatments</b>	<b>Patients</b>	<b>Trials design and methods</b>
Paparella , 2006 n=15/16 follow-up: In-hospital	off-pump CABG versus on-pump CABG	patient undergoing CABG	Parallel groups open
Parolari , 2003 n=NA	-	-	open
Parolari b , 2003 n=NA	-	-	open
Penttila , 2001 n=11/11 follow-up: In-hospital	off-pump CABG versus on-pump CABG	patients requiring CABG	Parallel groups open
PRAGUE 4 (Widimsky) , 2004 n=208/192 follow-up: 1 y	off pump versus on pump	cardiac surgery candidates	Parallel groups open
PROMISS (Uva) , 2010 n=75/75 follow-up: 5 weeks (498 days)	off-pump versus on-pump	patients between 30 and 90 years of age with multi-vessel coronary artery disease undergoing CABG with at least three distal coronary anastomoses	Parallel groups open
Puskas , 2004 n=NA	-	-	open
Raja b , 2003 n=150/150 follow-up: In-hospital	on-pump CABG versus off-pump CABG	patients undergoing CABG	Parallel groups open
ROOBY (Shroyer) , 2009 [NCT00032630] n=1104/1099 follow-up: 1 mo (1y)	off-pump CABG versus on-pump CABG	patients scheduled for urgent or elective coronary bypass surgery	Parallel groups open USA
Sahlman , 2003 n=NA	-	-	open
Selvanayagam , 2004 n=30/30 follow-up: In-hospital	off-pump CABG versus on-pump CABG	patients undergoing multivessel CABG	Parallel groups open
SMART (Staton) , 2003 n=100/100 follow-up: 12 months	off-pump coronary artery bypass versus CABG with cardiopulmonary bypass	patients unselected for coronary anatomy, ventricular function, or comorbidities	Parallel groups open with blinded assessment US
Syed , 2004 n=NA	-	-	open
Tang , 2002 n=NA	-	-	open
Tatoulis , 2006 n=50/50 follow-up: 30 days	off-pump CABG versus on-pump CABG	candidates for elective CABG	Parallel groups open

continued...

Trial	Treatments	Patients	Trials design and methods
Vedin , 2006 n=NA follow-up:	off-pump CABG versus on-pump CABG	patients between 50 and 80 years with stable angina pectoris, ejection fraction >30% , serum creatinine <150 micromol/l, and lack of tight main stem stenosis	open
Velisaris , 2003 n=NA	-	-	open
Vural , 1995 n=NA	-	-	open
Wan , 2004 n=NA	-	-	open
Wandschneider , 2000 n=NA	-	-	open
Zamvar , 2002 n=30/30 follow-up: 10 weeks	off-pump CABG versus on-pump CABG	patients undergoing coronary artery bypass graft surgery for triple vessel disease	Parallel groups open UK
GOPCABE <i>ongoing</i> [NCT00719667] n=NA follow-up:	Off-pump CABG versus ON-pump CABG	Elderly	Parallel groups open
OCTOPUS II <i>ongoing</i> n=NA	-	-	
Ontario <i>ongoing</i> [NCT00259493] n=NA follow-up: 3 months	Off-Pump CABG versus On-Pump CABG	-	Parallel groups double blind

## **2 About TrialResults-center.org**

TrialResults-center is an innovative knowledge database that collects the results of RCTs and provides dynamic interactive systematic reviews and meta-analysis in the field of all major heart and vessels diseases.

The TrialResults-center database provides a unique view of the treatment efficacy based on all data provided directly from clinical trial results, offering a valuable alternative to personal bibliographic search, published meta-analysis, etc. Furthermore, it would allow comparing easily the various concurrent therapeutic for the same clinical condition.

Rigorous meta-analysis method is used to populate TrialResults-center: widespread search of published and non published trials, study selection using pre-specified criteria, data extraction using standard form.

TrialResults-center is continually updated on a weekly basis. We continually search all new results (whatever their publication channel) and these news results are immediately added to the database with a maximum of 1 week.

TrialResults-center is non-profit and self-funded.
