

Clinical trials of ICD for acute myocardial infarction in all type of patients

TrialResults-center www.trialresultscenter.org

1 early implantation of ICD after MI

Trial	Treatments	Patients	Trials design and methods
early implantation of ICD after MI vs control			
IRIS , 2009 [NCT00157768] n=445/453 follow-up: 37 months	prophylactic ICD implantation early after myocardial infarction versus optimal medical therapy alone	patients patients at increased risk 5 to 31 days after AMI	Parallel groups open

2 Implantable cardioverter defibrillator therapy

Trial	Treatments	Patients	Trials design and methods
ICD vs no ICD			
MADIT-II , 2002 n=742/490 follow-up: 20 months	implantable cardiac defibrillator versus no ICD, optimized medical therapy	patients with a prior myocardial infarction and EF<=0.30	Parallel groups open
DINAMIT , 2004 n=332/342 follow-up: 30 months	implantable cardioverter defibrillator versus no ICD, optimized medical therapy	patients within 640 days of myocardial infarct ischemic with EF<=0.35 and cardiac autonomic modulation (depressed heart rate variability or increased mean 24-hour heart rate)	Parallel groups open

3 About TrialResults-center.org

TrialResults-center is an innovative knowledge database that collects the results of RCTs and provides dynamic interactive systematic reviews and meta-analysis in the field of all major heart and vessels diseases.

The TrialResults-center database provides a unique view of the treatment efficacy based on all data provided directly from clinical trial results, offering a valuable alternative to personal bibliographic search, published meta-analysis, etc. Furthermore, it would allow comparing easily the various concurrent therapeutic for the same clinical condition.

Rigorous meta-analysis method is used to populate TrialResults-center: widespread search of published and non published trials, study selection using pre-specified criteria, data extraction using standard form.

TrialResults-center is continually updated on a weekly basis. We continually search all new results (whatever their publication channel) and these news results are immediately added to the database with a maximum of 1 week.

TrialResults-center is non-profit and self-funded.
