

Clinical trials of proton-pump inhibitors for percutaneous coronary intervention in patients receiving clopidogrel

TrialResults-center www.trialresultscenter.org

1 proton-pump inhibitors

Trial	Treatments	Patients	Trials design and methods
omeprazole vs placebo			
COGENT , 2009 <i>unpublished</i> [NCT00557921] n=NA follow-up: 133 days (mean)	CGT-2168 (75-mg clopidogrel with 20 mg of omeprazole) once daily versus placebo	patients requiring clopidogrel for at least 12 months, typically following non-ST-segment-elevation ACS, STEMI, or stent implantation	Parallel groups double blind US, Canada, Mexico, Australia, Chile, and Europe
OCLA , 2008 [NCT00349661] n=NA follow-up: 7 days	omeprazole 20 mg daily versus placebo	patients undergoing coronary artery stent implantation	Parallel groups double blind France
pantoprazole vs omeprazole			
PACA , 2009 n=52/52 follow-up: 1 mo	pantoprazole 20 mg versus omeprazole 20 mg	patients undergoing coronary stenting for nonST-segment elevation acute coronary syndrome	Parallel groups

2 About TrialResults-center.org

TrialResults-center is an innovative knowledge database that collects the results of RCTs and provides dynamic interactive systematic reviews and meta-analysis in the field of all major heart and vessels diseases.

The TrialResults-center database provides a unique view of the treatment efficacy based on all data provided directly from clinical trial results, offering a valuable alternative to personal bibliographic search, published meta-analysis, etc. Furthermore, it would allow comparing easily the various concurrent therapeutic for the same clinical condition.

Rigorous meta-analysis method is used to populate TrialResults-center: widespread search of published and non published trials, study selection using pre-specified criteria, data extraction using standard form.

TrialResults-center is continually updated on a weekly basis. We continually search all new results (whatever their publication channel) and these news results are immediately added to the database with a maximum of 1 week.

TrialResults-center is non-profit and self-funded.
