

# Clinical trials of antiplatelets drug for acute myocardial infarction in all type of patients

TrialResults-center [www.trialresultscenter.org](http://www.trialresultscenter.org)

## 1 P2Y12 receptor antagonist

Trial	Treatments	Patients	Trials design and methods
<b>elinogrel vs error</b>			
<b>INNOVATE</b> <i>ongoing</i> [NCT00751231] n=NA follow-up:	-	-	
<b>elinogrel vs placebo</b>			
<b>ERASE-MI , 2009</b> n=34/36 follow-up: 30-37 days	elinogrel 10, 20, 40, or 60 mg as a single intravenous bolus versus placebo	STEMI patients	Parallel groups double blind

## 2 platelet aggregation inhibitors

Trial	Treatments	Patients	Trials design and methods
<b>aspirin vs control</b>			
<b>Huddinge , 1988</b> n=10/10 follow-up: 30d (12m)	aspirin 500mg/d starting 12 h after admission and then intermittently every third day for one month versus no aspirin	patients with acute myocardial infarction	Parallel groups open
<b>Frankfurt , 1976</b> n=25/28 follow-up: 14d	-	-	Parallel groups

continued...

Trial	Treatments	Patients	Trials design and methods
<b>dazoxiben vs control</b>			
Jones , 1987 n=60/60 follow-up: 1m	-	-	Parallel groups
<b>GR3219B vs control</b>			
GRAND , 1987 n=63/64 follow-up: 1m	-	-	Parallel groups
<b>misc. vs control</b>			
Gent-AMI , 1968 n=60/60 follow-up: 28d	-	-	Parallel groups
Johannessen , 1989 n=11/9 follow-up: 14d	-	-	Parallel groups
<b>sulfinpyrazone vs control</b>			
Dutch sulphinpyrazone , 1986 n=50/50 follow-up: 21d	-	-	Parallel groups
<b>ticlopidine vs control</b>			
Knudsen-A , 1985 n=24/19 follow-up: 3m	ticlopidine 500mg/d versus placebo	patients with AMI	Parallel groups double blind
<b>aspirin vs placebo</b>			
ISIS-pilot , 1987 n=313/306 follow-up: 1m	aspirin (325 mg on alternate days for 28 days) versus placebo	suspected acute myocardial infarction	Parallel groups double blind
ISIS-2 , 1988 n=8587/8600 follow-up: 35d	160 mg/day enteric-coated aspirin for one month versus placebo	suspected acute myocardial up to 24h	Parallel groups double blind
Dutch-aspirin , 1990 n=50/50 follow-up: 3m	aspirin (100 mg/day) for 3 months versus placebo	patients with first anterior wall AMI	Parallel groups double blind
APRICOT , 1993 n=107/95 follow-up: 3m	325 mg aspirin daily with discontinuation of heparin versus placebo	Patients treated with intravenous thrombolytic therapy followed by intravenous heparin and with patent infarct-related artery demonstrated at angiography within 48 hours	Parallel groups double blind The Netherlands
<b>clopidogrel vs placebo</b>			
CLARITY-TIMI 28 , 2005 n=NA follow-up: 30 days	clopidogrel (300-mg loading dose, followed by 75 mg once daily) versus placebo	patients, 18 to 75 years of age, within 12 hours after the onset of an ST-elevation myocardial infarction	double blind

continued...

<b>Trial</b>	<b>Treatments</b>	<b>Patients</b>	<b>Trials design and methods</b>
<b>COMMIT , 2005</b> [NCT00222573] n=22961/22891 follow-up: until discharge or up to 4 wee	clopidogrel 75 mg daily versus placebo	patients admitted to hospital within 24 h of suspected acute MI onset	Parallel groups double-blind
<b>flurbiprofen vs placebo</b>			
<b>French , 1993</b> n=234/230 follow-up: 6m	flurbiprofen 50 mg twice daily versus placebo	patients successfully treated for acute MI by thrombolysis and/or coronary angioplasty within 6 h of onset of symptoms	Parallel groups double blind
<b>sulfinpyrazone vs placebo</b>			
<b>Wilcox , 1980</b> n=49/49 follow-up: 10d	Sulphinpyrazone 200 mg four times daily versus placebo	patients with acute myocardial infarction	Parallel groups
<b>Louvain sulphinpyrazone , 1983</b> n=15/14 follow-up: 7d	sulphinpyrazone, 4 x 200 mg daily for 7 days versus placebo	recent myocardial infarction	Parallel groups double blind

### 3 About TrialResults-center.org

TrialResults-center is an innovative knowledge database that collects the results of RCTs and provides dynamic interactive systematic reviews and meta-analysis in the field of all major heart and vessels diseases.

The TrialResults-center database provides a unique view of the treatment efficacy based on all data provided directly from clinical trial results, offering a valuable alternative to personal bibliographic search, published meta-analysis, etc. Furthermore, it would allow comparing easily the various concurrent therapeutic for the same clinical condition.

Rigorous meta-analysis method is used to populate TrialResults-center: widespread search of published and non published trials, study selection using pre-specified criteria, data extraction using standard form.

TrialResults-center is continually updated on a weekly basis. We continually search all new results (whatever their publication channel) and these news results are immediately added to the database with a maximum of 1 week.

TrialResults-center is non-profit and self-funded.
