

# Clinical trials of oxygen therapy for acute myocardial infarction in all type of patients

TrialResults-center [www.trialresultscenter.org](http://www.trialresultscenter.org)

## 1 oxygen therapy

Trial	Treatments	Patients	Trials design and methods
<b>error vs control</b>			
Dekleva , 2004 n=NA	-	-	
<b>hyperbaric oxygen vs control</b>			
Sharifi , 2004 n=NA follow-up:	-	after percutaneous coronary intervention for acute myocardial infarction or unstable angina pectoris	
Swift , 1992 n=NA follow-up:	-	patients within 1 week of acute myocardial infarction	
Thurston , 1973 n=NA follow-up:	-	acute myocardial infarction	
Hot MI , 1997 n=112 follow-up:	-	Patients with an acute myocardial infarction who received recombinant tissue plasminogen activator	
HOT MI pilot , 1997 n=66 follow-up:	-	Patients with an acute myocardial infarction (AMI) who received recombinant tissue plasminogen activator	
<b>oxygen therapy vs control</b>			
Rawles , 1976 n=NA follow-up:	oxygen administered by MC mask throughout the first 24 hours versus air	myocardial infarction	
Ukholkina , 2005 n=NA follow-up:	-	patients with acute myocardial infarction	
Wilson , 1997 n=NA follow-up:	oxygen therapy versus control	patients presenting within 24 hours of onset of myocardial infarction	
<b>supersaturated oxygen vs control</b>			

continued...

Trial	Treatments	Patients	Trials design and methods
AMIHOT II , 2000 [NCT00175058] n=222/79 follow-up:	90-minute intracoronary supersaturated oxygen (SSO(2)) infusion in the left anterior descending artery infarct territory versus control	patients with anterior ST-segment elevation myocardial infarction undergoing percutaneous coronary intervention within 6 hours of symptom onset	
AMIHOT , 2007 n=NA follow-up:	hyperoxemic reperfusion for 90 min using intracoronary aqueous oxygen versus normoxemic blood autoreperfusion	patients with acute anterior or large inferior AMI undergoing primary or rescue PCI (<24 h from symptom onset) and successful PCI	
<b>Entonox vs placebo</b>			
Kerr , 1975 n=NA follow-up:	nitrous oxide 50% /oxygen 50% ('Entonox' analgesic apparatus) versus placebo	-	double-blind

## 2 About TrialResults-center.org

TrialResults-center is an innovative knowledge database that collects the results of RCTs and provides dynamic interactive systematic reviews and meta-analysis in the field of all major heart and vessels diseases.

The TrialResults-center database provides a unique view of the treatment efficacy based on all data provided directly from clinical trial results, offering a valuable alternative to personal bibliographic search, published meta-analysis, etc. Furthermore, it would allow comparing easily the various concurrent therapeutic for the same clinical condition.

Rigorous meta-analysis method is used to populate TrialResults-center: widespread search of published and non published trials, study selection using pre-specified criteria, data extraction using standard form.

TrialResults-center is continually updated on a weekly basis. We continually search all new results (whatever their publication channel) and these news results are immediately added to the database with a maximum of 1 week.

TrialResults-center is non-profit and self-funded.
