

# Clinical trials of anticoagulant for cardiovascular prevention in secondary prevention

TrialResults-center [www.trialresultscenter.org](http://www.trialresultscenter.org)

## 1 NOAC

Trial	Treatments	Patients	Trials design and methods
<b>rivaroxaban vs aspirin</b>			
COMPASS (rivaroxaban alone) <i>ongoing</i> [NCT01776424] n=27400 follow-up:	Rivaroxaban 2.5 mg twice daily alone versus aspirin 100 mg once daily	Patients With Coronary or Peripheral Artery Disease	
<b>rivaroxaban + aspirin vs aspirin</b>			
COMPASS (rivaroxaban + aspirin) <i>ongoing</i> [NCT01776424] n=27400 follow-up:	versus aspirin 100 mg once daily	Patients With Coronary or Peripheral Artery Disease	
<b>rivaroxaban vs placebo</b>			
COMMANDER HF <i>ongoing</i> [NCT01877915] n=5000 follow-up:	Rivaroxaban 2.5 mg versus placebo	Subjects With Heart Failure and Significant Coronary Artery Disease Following an Episode of Decompensated Heart Failure

<b>anticoagulant vs placebo</b>			
ASPECT , 1994 n=1700/1704 follow-up: 37 months	anticoagulant (nicoumalone or phenprocoumon) versus placebo	hospital survivors of myocardial infarction	
<b>oral anticoagulant vs placebo</b>			
Sixty Plus Reinfarction , 1980 n=NA follow-up: 2 years	oral anticoagulant therapy versus placebos instead of the anticoagulant	elderly patients who had been on anticoagulants ever since their primary myocardial infarction	double-blind
<b>warfarin vs placebo</b>			
WARIS , 1990 n=607/607 follow-up: 37 months	warfarin versus placebo	patients who had recovered from acute myocardial infarction (mean interval from the onset of symptoms to randomization, 27 days)	double-blind

### 3 About TrialResults-center.org

TrialResults-center is an innovative knowledge database that collects the results of RCTs and provides dynamic interactive systematic reviews and meta-analysis in the field of all major heart and vessels diseases.

The TrialResults-center database provides a unique view of the treatment efficacy based on all data provided directly from clinical trial results, offering a valuable alternative to personal bibliographic search, published meta-analysis, etc. Furthermore, it would allow comparing easily the various concurrent therapeutic for the same clinical condition.

Rigorous meta-analysis method is used to populate TrialResults-center: widespread search of published and non published trials, study selection using pre-specified criteria, data extraction using standard form.

TrialResults-center is continually updated on a weekly basis. We continually search all new results (whatever their publication channel) and these news results are immediately added to the database with a maximum of 1 week.

TrialResults-center is non-profit and self-funded.
