

Clinical trials of myocardial revascularization for stable angina in patients with Left Ventricular Dysfunction

TrialResults-center www.trialresultscenter.org

1 surgery

Trial	Treatments	Patients	Trials design and methods
CABG vs medical treatment			
CASS subgroup , 1985 n=78/82 follow-up: 7 years	CABG versus medical treatment	selected patients with chronic, stable coronary artery disease, sub group of patients ejection fractions above 0.34 but below 0.50 at base line	Parallel groups open
STICH (vs med) , 2011 [NCT00023595] n=602/610 follow-up: 56 months	CABG versus medical therapy	patients with congestive heart failure and severe LV dysfunction	Parallel groups open 26 countries

2 About TrialResults-center.org

TrialResults-center is an innovative knowledge database that collects the results of RCTs and provides dynamic interactive systematic reviews and meta-analysis in the field of all major heart and vessels diseases.

The TrialResults-center database provides a unique view of the treatment efficacy based on all data provided directly from clinical trial results, offering a valuable alternative to personal bibliographic search, published meta-analysis, etc. Furthermore, it would allow comparing easily the various concurrent therapeutic for the same clinical condition.

Rigorous meta-analysis method is used to populate TrialResults-center: widespread search of published and non published trials, study selection using pre-specified criteria, data extraction using standard form.

TrialResults-center is continually updated on a weekly basis. We continually search all new results (whatever their publication channel) and these news results are immediately added to the database with a maximum of 1 week.

TrialResults-center is non-profit and self-funded.
