Clinical trials of cell-based therapies for heart failure in all types of patients

TrialResults-center www.trialresultscenter.org

1 bone marrow derived stem cell

Trial	Treatments	Patients	Trials design and methods
Mesenchymal stem cells vs allogeneic mesenchymal stem cells			
POSEIDON , 2012 [NCT01087996] n=NA follow-up:	allogeneic MSCs versus autologous bone marrowderived mesenchymal stem cells delivered by transendocardial injection	patients with LV dysfunction due to ICM	
Bone marrow derived stem cell vs control			
CUPID 2b , 2016 [NCT01643330] n=NA follow-up:	-	patients with advanced heart failure	
FOCUS-CCTRN , 2012 [NCT00824005] n=92 follow-up:	-	patients with chronic ischemic heart failure	
Pokushalov (DOUBLON DIB) , 2010 n=55/54 follow-up:	Intramyocardial transplantation of autologous bone marrow mononuclear cells versus optimal medical therapy	patients with severe ischemic heart failure	Russia
Bone marrow mononuclear cells vs control			
Ang , 2008 n=NA	-	Elective CABG patients with established myocardial scars diagnosed as akinetic or dyskinetic segments by dobutamine stress echocardiography and confirmed at surgery	single-blinded
Hendrikx , 2006 n=NA follow-up: 4 months	-	patients with a postinfarction nonviable scar	
TOPCARE-CHD , 2006 [NCT00289822] n=NA	-	patients with stable ischemic heart disease who had had a myocardial infarction at least 3 months previously	
Yao , 2008 n=24/23	-	patients with stable ischaemic heart disease due to a previous MI	
Bone marrow progenitor cells vs control			
Manginas , 2007 n=NA	-	patients with old, nonviable anterior myocardial infarction	

continued...

Trial	Treatments	Patients	Trials design and methods
Patel , 2005 n=10/10	-	patients with ischemic cardiomyopathy and an ejection fraction of less than 35% who were scheduled for primary off-pump coronary artery bypass grafting	
Perin , 2012 n=10/10 follow-up: 6 months	-	patients with advanced ischemic heart failure	
Vrtovec , 2011 [NCT00629018] n=NA	-	patients with dilated cardiomyopathy	
Vrtovec , 2013 [NCT01350310] n=55/55	-	patients with dilated cardiomyopathy	
Stem cells vs control			
TAC-HFT , 2014 [NCT00768066] n=NA follow-up:	transendocardial injection of bone marrow-derived progenitor cells versus placebo	Patients With Chronic Ischemic Left Ventricular Dysfunction and Heart Failure Secondary to Myocardial Infarction	
Bone marrow derived stem cell vs placebo			
ABCD , 2010 n=24/20 follow-up:	-	Patients with nonischemic dilated cardiomyopathy	
INCL , 2015 [NCT00333827] n=NA follow-up: 6 months	bone marrow derived stem cell versus placebo	patients with dilated cardiomyopathy and heart failure in NYHA class III or IV	Parallel groups double blind Brazil
Bone marrow mononuclear cells vs placebo			
FOCUS-HF , 2011 [NCT00203203.] n=20/10 follow-up: 6 mo	-	patients with chronic HF	
Bone marrow derived stem cell vs sham			
C41750/3100 *ongoing* [NCT02032004] n=NA follow-up:	-	-

6 About TrialResults-center.org

TrialResults-center is an innovative knowledge database that collects the results of RCTs and provides dynamic interactive systematic reviews and meta-analysis in the field of all major heart and vessels diseases.

The TrialResults-center database provides a unique view of the treatment efficacy based on all data provided directly from clinical trial results, offering a valuable alternative to personal bibliographic search, published meta-analysis, etc. Furthermore, it would allow comparing easily the various concurrent therapeutic for the same clinical condition.

Rigorous meta-analysis method is used to populate TrialResults-center: widespread search of published and non published trials, study selection using pre-specified criteria, data extraction using standard form.

TrialResults-center is continually updated on a weekly basis. We continually search all new results (whatever their publication channel) and these news results are immediately added to the database with a maximum of 1 week.

TrialResults-center is non-profit and self-funded.
