

# Clinical trials of antidiabetic drugs for diabetes type 2 in patients insufficiently controlled on SU

TrialResults-center [www.trialresultscenter.org](http://www.trialresultscenter.org)

## 1 DPP-4 inhibitors add on SU

Trial	Treatments	Patients	Trials design and methods
<b>linagliptin vs placebo (add on SU)</b>			
<b>Lewin , 2010</b> [NCT00819091] n=NA follow-up: 18 weeks	linagliptin 5 mg versus placebo (add-on to sulphonylurea)	patients with type 2 diabetes and insufficient glycaemic control	double-blind

## 2 sulfonylureas G2

Trial	Treatments	Patients	Trials design and methods
<b>glipizide vs glyburide</b>			
<b>Rosenstock , 1993</b> n=139 follow-up: 4 months	glipizide, 2.5 or 5 mg/day versus glyburide, 1.25 or 2.5 mg/day	elderly patients with NIDDM that was controlled for at least 3 months with oral sulfonylurea therapy	Parallel groups open

## 3 About TrialResults-center.org

TrialResults-center is an innovative knowledge database that collects the results of RCTs and provides dynamic interactive systematic reviews and meta-analysis in the field of all major heart and vessels diseases.

The TrialResults-center database provides a unique view of the treatment efficacy based on all data provided directly from clinical trial results, offering a valuable alternative to personal bibliographic search, published meta-analysis, etc. Furthermore, it would allow comparing easily the various concurrent therapeutic for the same clinical condition.

Rigorous meta-analysis method is used to populate TrialResults-center: widespread search of published and non published trials, study selection using pre-specified criteria, data extraction using standard form.

TrialResults-center is continually updated on a weekly basis. We continually search all new results (whatever their publication channel) and these news results are immediately added to the database with a maximum of 1 week.

TrialResults-center is non-profit and self-funded.
