

Clinical trials of high dose chemotherapy for advanced breast cancer (metastatic) in all type of patients

TrialResults-center www.trialresultscenter.org

1 high-dose chemotherapy

Trial	Treatments	Patients	Trials design and methods
high-dose chemotherapy vs conventional-dose chemotherapy			
ECOG n=553 follow-up:	high-dose chemotherapy plus autologous hematopoietic stem-cell transplantatio versus Conventional-dose chemotherapy	women with metastatic breast cancer	
IBDIS , 2003 n=NA	-	-	
NCIC , 2001 n=NA	-	-	
PEGASE 03 , 2002 n=NA	-	-	
PEGASE 04 , 1999 n=61/29 follow-up:	HD-CT using the CMA regimen (Mitoxantrone, Cyclophosphamide, Melphalan) versus maintenance CT	-	
Schmid , 2005 n=NA follow-up:	double HDCT with cyclophosphamide, mitoxantrone, and etoposide followed by peripheral-blood stem-cell transplantation versus standard combination therapy with doxorubicin and paclitaxel	-

2 About TrialResults-center.org

TrialResults-center is an innovative knowledge database that collects the results of RCTs and provides dynamic interactive systematic reviews and meta-analysis in the field of all major heart and vessels diseases.

The TrialResults-center database provides a unique view of the treatment efficacy based on all data provided directly from clinical trial results, offering a valuable alternative to personal bibliographic search, published meta-analysis, etc. Furthermore, it would allow comparing easily the various concurrent therapeutic for the same clinical condition.

Rigorous meta-analysis method is used to populate TrialResults-center: widespread search of published and non published trials, study selection using pre-specified criteria, data extraction using standard form.

TrialResults-center is continually updated on a weekly basis. We continually search all new results (whatever their publication channel) and these news results are immediately added to the database with a maximum of 1 week.

TrialResults-center is non-profit and self-funded.
