Clinical trials of histone deacetylase (HDAC) inhibitors for advanced breast cancer (metastatic) in HR+ HER2-

TrialResults-center www.trialresultscenter.org

1 HDAC inhibitors

Trial	Treatments	Patients	Trials design and methods
Entinostat + exemestane vs exemestane			
ENCORE 301, 2013 [NCT00676663] n=64/66 follow-up:	entinostat 5 mg once per week + exemestane 25 mg daily versus exemestane plus placebo	Postmenopausal women with ER+ advanced breast cancer progressing on a nonsteroidal aromatase inhibitor	
NCT02115282 ongoing [NCT02115282] n=600 follow-up:	exemestane, entinostat versus exemestane, placebo	Patients With Hormone Receptor-Positive Advanced Breast Cancer	
Entinostat + fulvestrant vs fulvestrant			
NCT02115594 ongoing [NCT02115594] n=NA follow-up:	Fulvestrant + Entinostat versus Fulvestrant + Placebo	Postmenopausal Women With Hormone Receptor-Positive Advanced Breast Cancer

2 About TrialResults-center.org

TrialResults-center is an innovative knowledge database that collects the results of RCTs and provides dynamic interactive systematic reviews and metaanalysis in the field of all major heart and vessels diseases.

The TrialResults-center database provides a unique view of the treatment efficacy based on all data provided directly from clinical trial results, offering a valuable alternative to personal bibliographic search, published meta-analysis, etc. Furthermore, it would allow comparing easily the various concurrent therapeutic for the same clinical condition.

Rigorous meta-analysis method is used to populate TrialResults-center: widespread search of published and non published trials, study selection using pre-specified criteria, data extraction using standard form.

TrialResults-center is continually updated on a weekly basis. We continually search all new results (whatever their publication channel) and these news results are immediately added to the database with a maximum of 1 week.

 ${\it Trial Results-center} \ is \ non-profit \ and \ self-funded.$
