

# Clinical trials of anticoagulant for coronary artery disease in all type of patients

TrialResults-center [www.trialresultscenter.org](http://www.trialresultscenter.org)

## 1 anticoagulant

Trial	Treatments	Patients	Trials design and methods
<b>anticoagulant vs no anticoagulant</b>			
MacMillan , 1960 n=NA	-	-	
Borchegrevink , 1960 n=NA	-	-	
Clausen , 1961 n=NA	-	-	
Harvald , 1961 n=NA	-	-	
Conrad , 1964 n=NA	-	-	
Wasserman , 1966 n=NA	-	-	
Loeliger , 1967 n=NA	-	-	
Lovell , 1967 n=NA	-	-	
Seaman , 1969 n=NA	-	-	
Sorensen , 1969 n=NA	-	-	
Meuwisse , 1969 n=NA	-	-	
Drapkin and Merskey , 1972 n=NA	-	-	
<b>dicoumarol vs no anticoagulant</b>			
Apenstrom and Korsan-Bengtzen , 1964 n=NA follow-up:	-	-	
<b>coumarin congeners vs placebo</b>			
Sixty Plus Reinfarction , 1980 n=NA follow-up: 2 years	acenocoumarin orphenprocoumon versus placebos	elderly patients who had been on anticoagulants ever since their primary myocardial infarction	double-blind
<b>nicoumalone or phenprocoumon vs placebo</b>			

continued...

Trial	Treatments	Patients	Trials design and methods
<b>ASPECT , 1994</b> n=1700/1704 follow-up: 37 months	anticoagulant (nicoumalone or phenprocoumon) versus placebo	hospital survivors of myocardial infarction	
<b>phenprocoumon vs placebo</b>			
<b>Bredden , 1980</b> n=320/309 follow-up:	-	patients who had survived a myocardial infarction for 30-42 days	double-blind
<b>warfarin vs placebo</b>			
<b>WARIS , 1990</b> n=607/607 follow-up: 37 months	warfarin versus placebo	patients who had recovered from acute myocardial infarction (mean interval from the onset of symptoms to randomization, 27 days)	double-blind

## 2 About TrialResults-center.org

TrialResults-center is an innovative knowledge database that collects the results of RCTs and provides dynamic interactive systematic reviews and meta-analysis in the field of all major heart and vessels diseases.

The TrialResults-center database provides a unique view of the treatment efficacy based on all data provided directly from clinical trial results, offering a valuable alternative to personal bibliographic search, published meta-analysis, etc. Furthermore, it would allow comparing easily the various concurrent therapeutic for the same clinical condition.

Rigorous meta-analysis method is used to populate TrialResults-center: widespread search of published and non published trials, study selection using pre-specified criteria, data extraction using standard form.

TrialResults-center is continually updated on a weekly basis. We continually search all new results (whatever their publication channel) and these news results are immediately added to the database with a maximum of 1 week.

TrialResults-center is non-profit and self-funded.
