

Clinical trials of cholesterol lowering intervention for cardiovascular prevention in patients with renal insufficiency (on hemodialysis or transplant)

TrialResults-center www.trialresultscenter.org

1 ezetimibe

| Trial | Treatments | Patients | Trials design and methods |
|--|--|---|---|
| ezetimibe+simvastatin vs placebo | | | |
| SHARP , 2010 [NCT00125593] n=4193/4191 follow-up: 4.9 years | Simvastatin 20mg/Ezetimibe 10mg versus placebo | patients with established chronic kidney disease (dialysis or pre-dialysis) | Parallel groups double-blind 20 countries |

2 statins

| Trial | Treatments | Patients | Trials design and methods |
|--|---|--|---------------------------------|
| atorvastatin vs placebo | | | |
| Deutsche Diabetes Dialyse Studie (4D) , 2005 n=619/636 follow-up: 4 y (median) | atorvastatin 20mg daily versus matching placebo | patients with type 2 diabetes mellitus on maintenance hemodialysis | Parallel groups double blind |
| fluvastatin vs placebo | | | |
| ALERT , 2003 n=1050/1052 follow-up: 5.1 years | fluvastatin versus placebo | renal transplant recipients with total cholesterol 4090 mmol/L. | Parallel groups double blind |
| rosuvastatin vs placebo | | | |
| AURORA , 2009 n=1391/1385 follow-up: 3.2 y mean (max 5.6y) | rosuvastatin 10 mg daily versus placebo | in patients with end-stage renal disease on hemodialysis | Parallel groups double blind |

3 About TrialResults-center.org

TrialResults-center is an innovative knowledge database that collects the results of RCTs and provides dynamic interactive systematic reviews and meta-analysis in the field of all major heart and vessels diseases.

The TrialResults-center database provides a unique view of the treatment efficacy based on all data provided directly from clinical trial results, offering a valuable alternative to personal bibliographic search, published meta-analysis, etc. Furthermore, it would allow comparing easily the various concurrent therapeutic for the same clinical condition.

Rigorous meta-analysis method is used to populate TrialResults-center: widespread search of published and non published trials, study selection using pre-specified criteria, data extraction using standard form.

TrialResults-center is continually updated on a weekly basis. We continually search all new results (whatever their publication channel) and these news results are immediately added to the database with a maximum of 1 week.

TrialResults-center is non-profit and self-funded.
